Two hours of tennis is awesome! Have you tried acupuncture? It could help with the pain at night. My acupuncturist has done wonders for me and my weird hip pain.

And yes, PFAS will be keeping us all busy for quite some time! Except for you after December 31!

The knee has provided me with increased mobility. I played two hours of tennis yesterday and usually I walk several miles daily without much discomfort. That said, there is still considerable pain at night when I am lying down and not moving my knee. Hopefully, this will subside in time. Thanks for asking. Hope all is well with you. PFAS has been keeping you quite busy lately.

Thanks, Roger. How's the knee?

No. Chemours did not claim CBI on their GenX data. In fact, we have posted the GenX results on EPA websites in the past.

Thanks, Roger. Is this report part of what Chemours has claimed CBI on, Jenny?

Hi Jacquie and Pam,

I did review the most recent data report for GenX testing which Chemours has conducted over the past two or years. I disagree with Mr. Altman that the raw ground water levels have risen by 700% in the Little Hocking Water Supply. For example, the latest sample taken on 7/06/20, showed a raw water concentration of 0.23 ppb GenX. Approximately one year ago, the raw water concentration for GenX was 0.22 ppb, and on April 15, 2019, the raw water was measured to be 0.20 ppb. Truth is the raw water concentration varies quite a bit from one sampling event to the next. The Little Hocking Water Supply sampling results can be found on pages 22-38 of the attached report. Please let me know if you have any questions.

Roger

Sounds like a plan re: handling the info request, Jackie. I have to defer to Roger and Kevin on whether there was a GenX increase in the Little Hocking wells.

FYI team. This reads as a request for information to me, and I'd like to have it converted as such. Should we assign to both regions and pick one region as the lead for responding? Or, other ideas?

More importantly, I'd like to know more about the GenX increase in the Little Hocking wells. Did we get similar information from Chemours?

Sincerely,

Jacqueline Clark

Subject: Little Hocking Water Association -- GenX

Hi Jacquie,

I am looking for information on any GenX restrictions, orders or requirements imposed on the Washington Works facility in West Virginia. Do you know who in the US EPA would have such information? Little Hocking has seen the level in its wellfield grow 700% in recent months and wants to understand if there are any such GenX limitations.

Regards,

Dave
